

# BOTTLES ET PLASTIC TECHNICAL PARTS

## Product Datasheet

### Technical features by manufacturing processes

	Extrusion blowing of hollow plastic structure	Blowing of plastic preforms
	From needle hole Ø to a wide aperture (cutting in the mould)	Ø 38 mm 3 threads (tamper resistant) Ø 28 mm /410 (all standard caps)
<b>Matière</b>	PEHD High density Polyethylene PEBD Low density Polyethylene PP Polypropylene EVA Ethylene vinyl acetate	PET Polyethylene terephthalate Sur demande : PET Recyclable at the level of 50%
<b>Colour</b>	Standard : Translucent Other colours with minimum quantity	Standard : Transparent Other colours with minimum quantity
<b>Capacity</b>	From 75 ml to 5 liters	From 100 ml to 2 liters
<b>Quality Certification</b>	Class 10 000 clean room ISO 9001 BRC IoP revision 4	Salle propre – Classe 10 000 ISO 9001 BRC IOP version 4
<b>Tracability</b>	Date and hour for each unit of packaging	Date and hour for each unit of packaging
<b>Packaging</b>	Tray or cardboard box	Tray or cardboard box

### Applications

**Market segments:** pharmaceuticals, cosmetology, foodstuffs, industries and agrochemical

### Avantages and Benefits

<b>Constant quality guarantee</b>	On a powerful manufacturing tool ensuring dimensional controls and resistance on line
<b>Low production launch</b>	Extrusion blowing : 400 000 units per product type Blowing of preforms : 150 000 units per product type
<b>Important stock</b>	Storage capacity of 2500 m <sup>2</sup>
<b>Production capacity</b>	Important up to 40 Millions of bottles (20 Millions for PET bottles)
<b>French manufacturing</b>	Factory 100% French ownership
<b>Single point of contact</b>	Unique person dedicated to the follow-up of order, sampling and product delivery
